Managing Editor

The *Rhode Island Medical Journal* (RIMJ) welcomes commentaries, perspectives and opinion pieces from area healthcare professionals, students, residents, fellows, trainees and faculty members.

Topics should address timely issues in medicine, public health, health policy, research, and medical education relevant to the target audience. Writing from personal experience is welcome.

Send to: RIMJ Editor-in-Chief  
and Managing Editor

### Criteria

**1. Original material:** Should not have been published wholly or partially in print or online, including websites, blogs and social media, and should not be under consideration for publication in other outlets.

**2. Authors:**

a. All authors must have contributed to the concept, preparation and writing of the manuscript and approved the final, submitted version.  
**Maximum: 1–4.**

b. For students, residents, fellows, trainees, senior authorship is strongly recommended, except when writing about a unique and personal experience relevant to the author.

c. Senior authors/mentors should provide direct guidance and critique and are responsible for an in-depth review of the commentary prior to submission.

**3. Word count:** 750–1,200

**4. References:** Should be up to date, relevant, with full text available.

**Maximum: 12**

**5. Figures, charts, or images,** accompanied by Legends and Source.

**Maximum: 4**

**6. Accompanying material:** Include title, authors, academic affiliations and corresponding author information.

**7. Forms:** Copyright transfer, author financial disclosures required.

### Content considerations

**Introduction:** Should have a concise, considered premise, hypothesis or focus that is clearly stated in the opening paragraph.

**Development:** Should provide the reader with some new perspective or unique opinion with current research/data included if applicable. Avoid well-known generalities and well-established facts.

**Conclusion:** Should be drawn from the main idea with present and future implications/solutions to the argument/premise presented.
